FULL SERVICE GEOSCIENCE SOLUTIONS | ACQUISITION | PROCESSING | INTERPRETATION | MICROSEISMIC | MULTI CLIENT

GAIN *InSight*SM

WHAT IS INSIGHT?

STRATEGY. KNOWLEDGE. ANALYTICS. UNDERSTANDING.
DISCERNMENT. VISION. FORETHOUGHT. PERCEPTION.

For all your geoscience solutions, Global Geophysical Services delivers InSight.

Global Geophysical Services formulates geoscience decisions differently. We use insight. You can *Gain InSight* with our powerful Reservoir Grade 3D (RG3D) seismic acquisition capabilities, expert processing and analysis, innovative microseismic technologies, and expansive multi client services.

Complete InSight.

With our extensive insight for data acquisition, microseismic technologies, and processing and interpretation services, we are able to deliver high-quality data used to create high-resolution images of the earth's subsurface and reveal complex structural and stratigraphic details. Our data and resulting high-quality images are used from exploration to exploitation, by both geoscientists and engineers, to identify prospects and drilling targets, and to derive fluid and geomechanical properties essential for optimizing production in conventional and unconventional resource plays. *That is complete InSight.*

OUR EXPERTISE

Worldwide Land Acquisition
Worldwide Marine & TZ Acquisition
Processing, Analysis & Interpretation
Multi Client Data Library

Gain InSight with
Global Geophysical
Services' latest
technology, innovative
data acquisition, expert
processing methods,
and an unparalleled
drive for excellence.

Global Geophysical Services integrates seismic survey design, data acquisition, microseismic technology, and expert processing and interpretation to provide insight to our clients. In addition, we own and market a growing multi client data library and license these data sets to clients on a non-exclusive basis. Many of the world’s largest and most technically advanced oil and gas exploration and production companies—including national oil companies, major integrated oil and gas companies, and independent oil and gas E&P companies—use our InSight.

Global Solutions

GLOBAL GEOPHYSICAL SERVICES

THE GLOBAL LEADER IN ACQUIRING, PROCESSING, IMAGING, ANALYZING AND INTERPRETING THE BEST AZIMUTHAL RESERVOIR GRADE SEISMIC ACROSS THE EARTH AND SEAFLOORS.

ACQUISITION

Acquisition InSight. Global Geophysical is an expert provider of High Density Reservoir Grade 3D™ (RG3D) seismic solutions. With one of the industry’s largest portfolio of modern seismic recording systems, we record data sets with long offsets, rich azimuth, improved spatial resolution, and increased signal-to-noise ratio, all at world-record paces onshore, through the transition zone and across the sea floor.

PROCESSING & INTERPRETATION

Processing and Imaging InSight. Global Geophysical processing and imaging solutions are provided by industry-recognized Weinman GeoScience. Founded in 1983, Weinman provides expert geophysical, and geological consulting, data processing, and engineering services to the energy industry. Weinman is an expert provider of azimuthal processing solutions for enhanced imaging and fracture prediction. Our high-density RG3D acquisition technology, combined with Weinman’s azimuthal processing solutions and fracture prediction maximizes seismic image potential.

MULTI CLIENT SERVICES

Multi Client InSight. Global Geophysical continues to build the premiere seismic data library. Our data sets are designed and processed to deliver exceptional imaging and attribute information in both conventional and “resource play” exploration and production opportunities. We provide a fully integrated view of reservoir investment opportunities across complete regions—Basin Insight.

MICROSEISMIC TECHNOLOGIES

Microseismic InSight. Global Microseismic leverages the synergies between Global’s capabilities in land seismic data acquisition, Multi Client seismic programs, and Weinman Geoscience data processing and geophysical technology—and integrates these capabilities to provide the most cost-effective and highest quality microseismic service offering in the industry.

NODAL TECHNOLOGIES

Nodal InSight. Global Geophysical develops and provides next-generation autonomous nodal recording systems. Purpose-built to facilitate full azimuth Reservoir Grade 3D, our proprietary continuous-recording nodal systems (AutoSeis HDR) deliver exceptional data quality (via 32 bit format) and exceptional productivities.

COMPLETE INSIGHT.
FULL SERVICE GEOSCIENCE SOLUTIONS

Global Geophysical Services was launched in 2005 by some of the most experienced professionals in the seismic business. We combine the innovation, and accountability of the trusted geophysical industry with the latest technology, state-of-the-art equipment, and highest HSEQ standards in today's seismic industry.

Global Geophysical Services provides an integrated suite of seismic data solutions including high resolution RG-3D Reservoir Grade™ (RG3D) data acquisition, microseismic monitoring, seismic data processing, analysis and interpretation services, and multi client data products and services. Global Geophysical Services combines wisdom and experience, operational safety and environmental responsibility with leading edge technology to facilitate the success of our clients around the world.

Global Advantage

FULL SERVICE GEOSCIENCE SOLUTIONS

POWERFUL ACQUISITION. EXPERT SURVEY DESIGN.
THE MOST INNOVATIVE SURVEY METHODS. HIGHEST
TECHNOLOGY PROCESSING AND INTERPRETATION.

HSEQ EXCELLENCE

Global Geophysical has expertise working in over 100 countries throughout the world. Our Health, Safety, Environment and Quality (HSEQ) Management System is designed to ensure that all company operations are conducted in the lowest risk environment as possible, and meet or exceed local work place HSEQ requirements. Our goal: *Aim for zero. Perfection is not impossible.*

HUMAN KNOWLEDGE & CAPITAL

Our industry-leading management team continues to attract some of the most successful and experienced industry professionals to Global. Today we employ over 800 people worldwide—our employees have hundreds of years of cumulative experience working seismic operations in over 100 countries and in almost every major hydrocarbon basin.

GEOSCIENCE KNOWLEDGE & CAPITAL

Our full service geoscience services include data processing, geophysical, geological and engineering services. We provide industry-leading, expert azimuthal processing solutions for enhanced imaging and fracture prediction.
